GENERAL PRINCIPLES

The City of El Paso supports legislation that enhances the City's ability to solve problems and improve the quality of life for its citizens. The City of El Paso opposes legislation that reduces the City's authority or increases the City's costs. We will work with other cities to enhance and protect the authority of municipalities and to ensure that City taxpayers are not burdened with additional unfunded mandates.

The City of El Paso will also support legislative initiatives of community partners that enhance the educational, cultural, and infrastructure resources in our region.

The City of El Paso will oppose legislation that reduces a municipality's ordinance making authority.

This document reflects the City's adopted legislative policy as approved by City Council. The City's legislative program is organized into two categories:

I. Priority Legislative Initiatives

The City will actively seek to secure legislators to author bills for these initiatives, unless otherwise noted. The City will support and provide positive testimony for these initiatives and actively pursue passage of the bill.

II. Statement of Support or Opposition

City staff and authorized representatives will make known the City's position on these issues. Depending on the issue, staff will work to either assist in the passage of the bill or work against passage to preserve the City's interests. The important distinction between this category and the earlier category is that the City will not seek introduction of any legislation, but will vocalize the City's position in support or opposition.

I. PRIORITY LEGISLATIVE INITIATIVES

The City will actively seek the passage of the following initiatives using City staff and authorized representatives to secure legislators to author a bill, provide testimony, and advocate for the bill's passage throughout the legislative process:

- 1) Appropriate money for the Defense Economic Adjustment Assistance Grant (DEAAG) program to fund military value projects that strengthen Texas military installations.
- 2) Appropriate funding for the Wyler Aerial Tramway.
- 3) Seek legislation that will expand program eligibility under the Texas Economic Development Act to include back office and large scale warehouse distribution companies and extend the Act.
- 4) Seek legislation that will clearly allow municipalities to convey City owned property as part of a Chapter 380 economic development agreement.
- 5) Seek legislation concerning police reform and training that will enhance and foster public trust in the police department, to include the appropriation of funding to municipalities for the acquisition of police body cameras and storage of data obtained by body cameras.
- 6) Seek legislation that will provide for more economic incentives and support for solar and renewable energy initiatives.
- 7) Seek legislation that will strengthen community safety and prevent mass violence by strengthening existing laws to allow for a stronger more efficiently and consistently enforcement of laws and new legislation that will assist in the identification of risk indicators for potential threat to include the use and role of mental health professionals and ways to reduce the risk.

II. STATEMENTS OF SUPPORT & OPPOSITION

The City will either support or oppose legislation regarding the following issues meaning that, if a bill is introduced, then City staff and authorized representatives will make known the City's position on these issues and will work to either pass or defeat the legislation accordingly. The important distinction between this category and the "priority" category is that the City will not work to seek introduction of any legislation but will engage if a bill is otherwise introduced.
